SI-770

2-way Built-In Center Speaker

Applications:

The SI-770 features the same components as the SI-760 and the 661-SE from the Signature Series; however, this model is slightly different. The SI-770 was strictly designed to be placed into custom cabinetry. The SI-770 uses a special crossover network that enhances mid-range and high frequencies so the speaker is better suited for "built in" applications such as custom cabinetry.
