signature series in-wall

RBH's Signature In-wall speakers are designed to provide exceptional sound quality in a custom, built-in environment. These speakers are built with the same high quality components used in our award-winning Signature Series conventional floor-standing speakers. All RBH Signature In-wall speakers include a rigid MDF (medium density fiberboard) enclosure. RBH's Signature In-wall speakers are for someone who wants purity of sound built into their home, which until now, has only been available in high-end freestanding loudspeakers.
