COMPACT THEATER SPEAKERS

REDEFINING THE WAY YOU EXPERIENCE SOUND.™

# RBH Sound CT Compact Theater Speakers

Over the years, RBH Sound has been recognized for the superior sound of our loudspeakers and commended for our technical achievements and advancements in acoustic reproduction. RBH's innovative Compact Theater systems exemplify our commitment to adapting to the changing home theater environment, while continuing to foster quality craftsmanship and exceptional performance.

RBH Sound designers also appreciate that some rooms cannot accommodate large speakers and some décors simply were not meant to. Based on this, we endeavored to create an unimposing speaker system which easily fits into any lifestyle. At RBH, we refuse to sacrifice our integrity by compromising the overall performance of our speakers: our Compact Theater systems speak for themselves. In addition, the speaker packages are available in white or black.

The Compact Theater systems offer the unparalleled value and an incomparable attention to detail which have come to be expected from RBH. In crafting the CT systems, we sought to maximize the performance of these tiny speakers and create the illusion of a movie theater within the confines of a home theater. The center and satellite speakers are constructed from die-cast metal enclosures that make the speakers extremely inert; the non-parallel sidewalls also help eliminate internal standing waves.

RBH's exclusive Tuned Aperiodic Vent (TAV™) technology (found in the MS-10.1) allows increased performance from its smaller cabinet volume. TAV™ provides better low frequency extension and efficiency than a similar sized sealed system.

*The Compact Theater systems are unlike any "mini" home theater speaker systems currently on the market. With new surround sound formats like Surround EX and dts-ES Discrete, we decided to create an affordable and easy speaker solution. The standard 5.1 system is comprised of four MM-4 satellite speakers for main and surround channels, one C-4 center speaker and an MS-8.1 subwoofer. Just by adding another pair of MM-4's, you can easily upgrade at a later date to a 7.1 system, or purchase the complete 7.1 package and immediately enjoy the sonic benefits of a totally integrated and matched eight-speaker system.*

**MM-4 Mini Bookshelf**

**Drive Units:** (1) 4" (102mm) Active Woofer  
(1) 1" (25mm) Tweeter  
**Power:** 10-100 Watts  
**Sensitivity:** 85dB (2.83V @ 1 Meter)  
**Impedance:** 8 Ohms  
**Dimensions:** 5"W x 7 1/4"H x 4 1/2"D  
(127mm x 184mm x 114mm)

**Frequency Response:** 100Hz-20kHz ±3dB  
**Crossover Frequency:** 3000Hz  
**Cabinet Color:** White or Black Brushed Aluminum  
**Grille Color:** White or Black  
**Weight:** 4 Lbs. (1.81 Kg)

**C-4 Mini LCR/Center Channel**

**Drive Units:** (2) 4" (102mm) Woofers  
(1) 1" (25mm) Tweeter  
**Power:** 10-120 Watts  
**Sensitivity:** 88dB (2.83V @ 1 Meter)  
**Impedance:** 6 Ohms  
**Dimensions:** 5"W x 11 3/4"H x 4 1/2"D  
(127mm x 299mm x 114mm)

**Frequency Response:** 100Hz-20kHz ±3dB  
**Crossover Frequency:** 3000Hz  
**Cabinet Color:** White or Black Brushed Aluminum  
**Grille Color:** White or Black  
**Weight:** 8 Lbs. (3.62 Kg)

**MS-8.1 Powered Subwoofer**

**Drive Units:** (2) 8" (203mm) Woofers  
**Power:** 200 Watts (RMS Power)  
**Dimensions:** 13"W x 11 1/4"H x 13"D  
(330mm x 286mm x 330mm)

**Frequency Response:** 35Hz-180kHz ±3dB  
**Crossover Frequency:** 50-160 (Variable)  
**Video Shielding:** Brushed Aluminum/Black  
**Cabinet Color:** Black/White  
**Grille Color:** Black/White  
**Weight:** 35 Lbs. (15.87 Kg)

**MS-10.1 Powered Subwoofer With TAV**

**Drive Units:** (2) 10" (254mm) Woofers  
**Power:** 200 Watts (RMS Power)  
**Dimensions:** 7-1/8"W x 45"H x 16-1/4"D  
(181mm x 1143mm x 95mm)

**Frequency Response:** 27Hz-180kHz ±3dB  
**Crossover Frequency:** 50-160 (Variable)  
**Video Shielding:** Brushed Aluminum/Black  
**Cabinet Color:** Black  
**Grille Color:** Black  
**Weight:** 45 Lbs. (20.41 Kg)

**CT-5.1 System**

At RBH, we understand not everyone is prepared to take the plunge into seven-channel surround sound or may not yet have the equipment to support a system of this caliber. For this reason, we also offer a standard CT-5.1 system that boasts the same build quality and materials as its sophisticated counterpart. The CT-5.1 system consists of four MM-4 satellite speakers, one C-4 center speaker and one MS-8.1 powered subwoofer.

**CT-7.1 System**

The CT-7.1 adds an additional pair of MM-4 satellite speakers so homeowners can take advantage of exciting new surround sound processing schemes like Dolby Digital EX and dts-ES Discrete and other matrixed 8-channel surround sound modes.

**CT-MAX System**

As its name implies, CT-MAX is Compact Theater to the MAX! The CT-MAX utilizes the D' Apollito (mid/tweeter/mid) configuration of the C-4 at all 5 speaker locations and an MS-8.1 subwoofer to create an unparalleled, completely timbre matched home theater experience.
