

Product Specifications

IRE1
INFRARED EMITTER (SINGLE)

Description:

The IRE1 is an infrared emitter featuring clear adhesive tape, permitting instant removal of the emitter when rearranging or servicing components. Callbacks for reattachment of "fallen emitters" are reduced due to the improved adhesive used to hold the emitter in place. The emitter case may also be taken apart so the tiny internal emitter can be placed inside a component when desired. High infrared output from the top curved surface allows emitter to be mounted on a nearby surface, rather than directly on the sensor of the unit if needed.

Features:

- Provides IR signal to one component
- LED flashes to indicate operation
- Includes an 8-foot lead for easy hookup to the connecting block

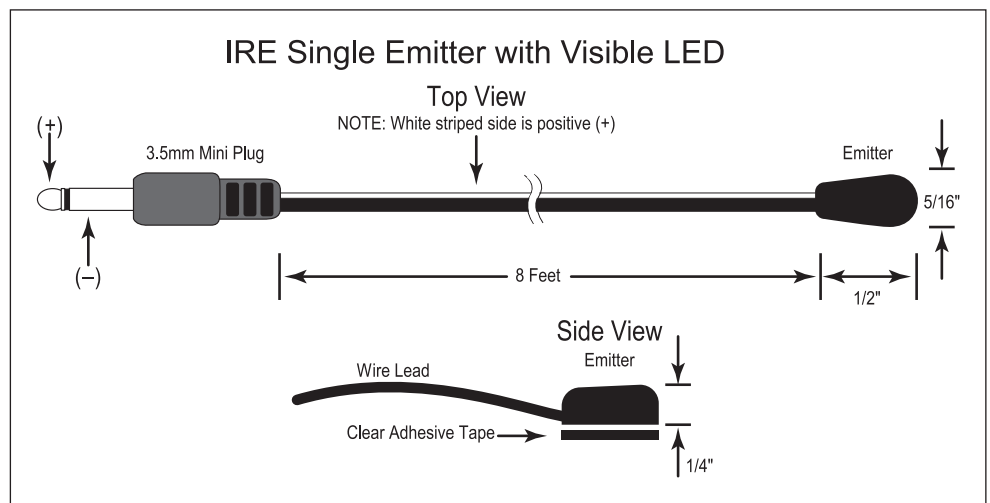

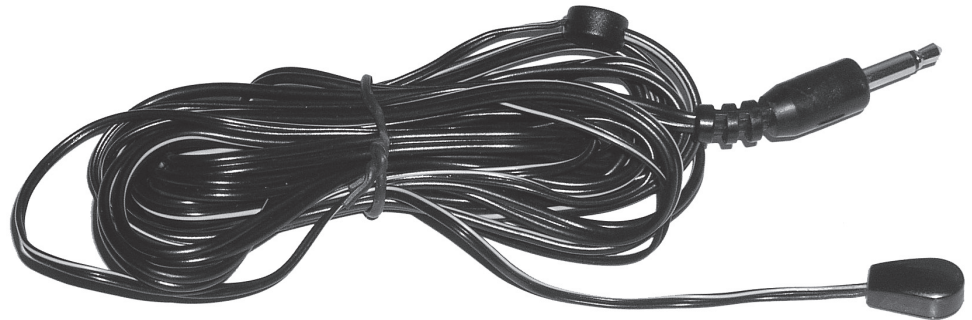

Applications:

- Two-channel Audio
- Multi-room Audio
- Patios, Pools, Spas, Hot Tubs, Etc.
- Outdoor Audio

Technical Information:

Model Number: IRE1

Warranty: 1 Year
