

# R8

## OUTDOOR ROCK SPEAKER

People are increasingly looking for ways to soundscape their environment in an effort to enjoy their favorite music in backyards, patios, balconies and gardens. The R8 outdoor speakers, available in brown, granite or sandstone finishes feature the look and feel of natural rocks. These high-quality rock speakers look great around the pool, pond and even hidden amongst garden plants. The R8 cranks out prominent bass with clean and crisp mid-range and treble from an 8-inch polypropylene woofer and a 1-inch polyurethane tweeter.

## OUTDOOR ROCK SPEAKER

### SPEAKER PLACEMENT

*R8 outdoor rock speakers are designed to be placed on the ground, with the grille facing the listening area. The speaker drivers are angled upward to provide proper vertical sound dispersion for listeners standing 10 feet or more away. Sound coverage in the horizontal plane is 100°. Keep this angle in mind when positioning the speakers for stereo reproduction. Too great a distance between any two speakers will create a dead spot in the coverage. When in doubt, use additional speakers to ensure adequate coverage.*

***Looking for ways to soundscape your outdoors?  
RBH Sound outdoor speakers are the answer.***
