

SV-44R

ON-WALL SURROUND SPEAKER

The SV-44R surround channel speaker employs dual, in-phase 4-inch reference aluminum cone woofers and dual out-of-phase 1-inch reference silk dome tweeters. The bi-/dipolar combination results in powerful bass and articulate yet diffuse high frequencies. This combination is designed to prevent the pinpointing of the speaker's exact location by the ear. The SV-44R is designed to be easily installed on a wall using its integrated keyhole brackets and is exactly what you would expect from a truly distinguished home theater surround speaker. The SV-44R is the answer to excellent surround channel performance without the large footprint.
