ON-WALL SPEAKERS

ULTRA-3

ON-WALL/LCR SOUNDBAR SPEAKER

Yes, it's cool. It's fast to mount. And....it's custom sized to fit most on-wall TVs. It can be custom cut to match TV widths of 47 to 80 inches which fit most popular TV sizes. It still looks great under wider TVs as well. The Ultra-3 features contemporary design, magnetic mounted black fabric grille, and is only 1-5/8-inches deep.

High Performance Home Audio
Redefining the Way You Experience Sound™

Constructed not of plastic, but of MDF with internal bracing and separately sealed internal chambers for discrete left, center, and right channels to produce the great sound you need and expect from RBH. The end caps are also MDF covered in high-gloss black paint. Innovative and proprietary inverted, domed aluminum 4-inch woofers and aluminum tweeters with textured phase plugs make the small size and great sound possible. Our ez-wire terminals and fast mounting, with highly secure screw-through front mounts, make the Ultra-3 a joy to install. Combine the Ultra-3 with an RBH subwoofer and Ultra-1 speakers as surrounds for a beautiful surround sound solution. The Ultra-3 provides quick and brilliant sound.

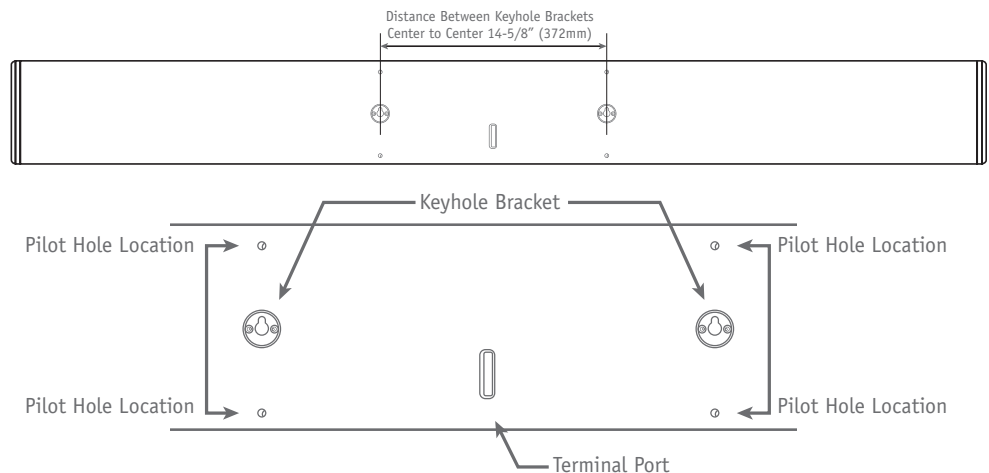

SPEAKER TERMINALS

The SB-39 Soundbar Speaker Bracket makes installation of this product even easier featuring, above or below the TV two-way installation by attaching to the TV wall bracket or directly to the TV.

KEYHOLE MOUNTING BRACKET

There are two mounting methods: Mount using the imbedded "+" round metal mounting bracket shown below or use the "screw-through ez-mount" method, (allows for tighter fit to edge of TV).

The Ultra-3 soundbar speaker is designed to be used as a LCR (Left-Center-Right) speaker with flat-panel TVs such as plasma and LCD monitors. This will usually dictate placing the speakers below or above the TV. The Ultra-3 speaker sounds best when placed with the speaker's back against a wall but optional mounting to TV using universal brackets to accommodate articulating TV mounting brackets is also possible.
