

# Product Specifications

SF12  
POWERED SUBWOOFER

## Description:

The SF12 powered subwoofer is a stylish and powerful subwoofer that will add depth and dimension to your music and movies. A subwoofer is a must-have component for any home theater or audio system. The performance of your subwoofer can greatly affect the overall performance of your system. Without the subwoofer, the deep bass on your music CDs and special effects on DVDs may not be heard and/or felt. Think of a subwoofer as a vital component that adds excitement to your theater or music experience. A subwoofer can add considerable low-frequency, deep bass performance to any home theater or audio system. With its integrated amplifier and 12-inch aluminum cone woofer. The SF12 adds detailed, pounding bass to any system. It does all this with a cabinet size that is smaller than you expect. When you want to rock the house without rocking the budget, the SF12 is the perfect choice.

## Applications:

- Two-channel Audio
- Multi-room Audio
- Home Theater
