Your custom installed SI-1212/9 or SI-12/9 are sealed design, built-in subs, perfect for music and movies. The sealed design provides quick response and deep, accurate life-like bass.

Hidden in your floor or ceiling, the SI-1212/9 or SI-12/9 are your perfect solutions, providing clean aesthetics yet uncompromised performance. (requires 9" install depth.)

# SI-12/9

# SI-1212/9

The SI-12/9 and SI-1212/9 are single or dual 12-inch non-powered subwoofers designed specifically to be installed in between ceiling or floor joists. The subwoofers play into your room through an ordinary HVAC vent grille and are the perfect subwoofers for home theaters, listening rooms, or anywhere strong, definitive bass is needed without being seen. Self resetting protection circuitry is incorporated to prevent damage to the subwoofers if ever overdriven. We recommend using the RBH DA-1202 amp for the SI-12/9 and the DA-1802 amp for the SI-1212/9.

## SI-SERIES IN-WALL Subwoofer

- Proprietary damped, accurate, high power-handling, aluminum subwoofer drivers

- Smart protection circuitry is incorporated to prevent driver damage if over driven

- Sealed design in cabinet sized for optimal tuning resulting in stellar low-end performance.

- Multiple options in the SI series are designed for a wide range of requirements

- SI series options include in-wall, in-floor and in ceiling to provide installation solutions
