

UNRIVALED SFTR/AX

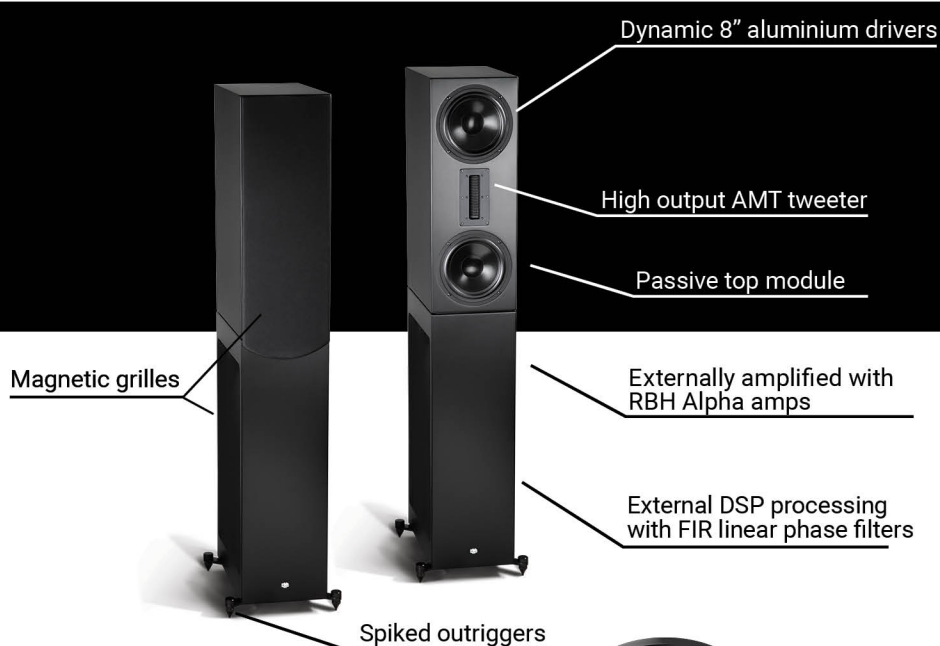

SF series

rbh unrivaled modular system

UNRIVALED MODULAR TOWER

EXTRAORDINDARILY POWERFUL AND PRECISE

You will become completely immersed in sound with the immense power of this flexible modular tower. The dual, sealed, reference 12" sub supplements the full range 821-SF/R with perfection.

If you are looking for an unrivaled performance with minimum footprint, this speaker is the answer. It offers the ultimate blend of dynamics, musicality, and precision.

UNRIVALED SFTR/AX

This modular tower system combines the 821-SF/R speaker with the 1212-MS/R subwoofer to create an incredible reference tower. Combined with a Linear Phase FIR DSP engine and RBH Sound Alpha amplification creates a top tier performance for a mid tier price. Adopting many of the design features that are in the flagship SVTRS/AX system, the SFTR/AX is an impressive system with minimal footprint. The subwoofer module is purpose built to supplement the dual 8-inch aluminum mid-woofers and reference AMT tweeter in the top module with depth defying, musical bass. The dual 12-inch reference aluminum sub drivers deliver the sonic impact, clarity and low-end extension of a much larger speaker. You will be amazed at this speaker's dominance in both home theater or critical two channel listening and is truly an Unrivaled experience.

SF-SERIES

- Freestanding -
- Bookshelf -
- On-wall -
